Re: Crown Communications Inc.  
Case No. 98-067  
Crown Site 224KYA

Gentlemen/Madams:

Crown Communications, by a registered letter, notified us of their intention to apply for approval of the above Re: site, to erect a tower thereon.

During the month of April and May, 1997, Crown, thru their Site Acquisition Specialist " Tony Weiter ", had a lease agreement with us, for the location of this tower on our adjacent property. Just before the complete signing, by us, we received a call from Mr. Weiter, cancelling this lease, because of accessibility, and the cost of erection, etc, etc. Also we were informed that MCI, had a tower on part of our property, Bell Mobility is also located on property adjacent to our property and has an access easement from South Park Road to the extreme southeast corner of their lease area.

We request that Crown supply us with Sheets 1 and 3 to further complete the impact on the area of this tower. Also due to the reduction in size of the sheet it is very hard to read and some portions are not readily identified.

Crown states, " the search area is evaluated for the existence of other towers currently existing that could provide collocation opportunities? Bell Mobility and MCI are both within 500' of the proposed location. Crown also states, " there are no existing towers or suitable structures within the designated search area adequate to fulfill their objectives?? Crown also states, "there are no alternative sites within the search area ?? Crown also states, " The site does not have steep slopes requiring special construction practices ??". Crown also states, " The proposal has adequate access from public streets, the last time I visited this area, the access road was not accessible to Crown's proposed site area, due to a gate and being locked with signs designating this as accessible only to certain parties ??

Sincerely yours

Wm. C. Lattis
